Skills & Certifications

Languages	Apex, Java, Python, C++, HTML, CSS, JavaScript, Next.js, SQL
Technologies	AWS, GCP, Azure, Docker, Git, Jira, React.js, Next.js, MySQL, MongoDB, Snowflake, Qlik Sense, Tableau, Power BI
Salesforce	Sales Cloud, Service Cloud, Data Cloud, CRM Analytics, Mulesoft, CPQ, Lightning Web Components, Aura Components, Workflows, Visualforce Pages, Validation Rules, Process Builder, Triggers, Asynchronous Apex, Lightning Flows, Platform Events, Salesforce DX, REST API, SOAP API, Agentforce
Certifications	Platform Developer I & II, Administrator, Advanced Administrator, App Builder, JavaScript Developer, Sales Cloud Consultant, Sharing & Visibility Architect, Data Architect, Application Architect

Experience

SENIOR CONSULTANT

Mar 2025 - May 2026

RUTGERS UNIVERSITY

New Jersey, USA

- Re-engineered Enrollment Management Reporting applications to meet business needs & reduced report generation time by 30%.
- Automated student lifecycle processes** in Education Cloud by building flows and lightning web components to generate program enrollments on admission, update statuses on course completion, and trigger student & staff notifications.
- Built a full stack application with heavy DOM manipulation using LAMP stack to document curriculum changes.

ENGINEER: CUSTOMER SUCCESS

Sep 2022 - Jan 2025

SALESFORCE

Hyderabad, India

- Engineered scalable Salesforce solutions for **lead-to-cash, sales, billing, and marketing processes**.
- Architected end-to-end **CPQ renewal automation** workflows, configuring subscription, contract-based renewal models, and auto-generated renewal opportunities; cutting renewal quote preparation time by 60% for enterprise clients.
- Built and **configured data pipelines** across enterprise systems leveraging Mulesoft and Tray.io to handle complex integrations and streamline data flow so the team has clean, synchronized data to analyze performance and surface improvements.
- Successfully **implemented migration** from On-Prem legacy Data systems (Cases, Accounts, Knowledge Articles) to a single unified Cloud Infrastructure (Salesforce) using custom-developed services.
- Integrated Salesforce across the enterprise systems like Conga, DocuSign via **REST/SOAP APIs** to keep records in sync, and analyzed pipeline data to quantify impact and recommend where leadership should prioritize strategic investments and forecast accuracy.
- Leveraged AI and LLM** capabilities into existing tools and workflows to automate manual work and scale team output increasing efficiency by 3x partnering with senior engineers on more complex builds.
- Partnered directly with Account Executives, SDR, Sales, and RevOps stakeholders to identify workflow bottlenecks, translated data-driven **revenue recognition pipeline** and frameworks.
- Responsible for driving solid design principles and best practices across cross-functional teams, raising code quality.

SOFTWARE ENGINEER

Sep 2021 - Sep 2022

COFORGE

Noida, India

- Analyzed existing sales quoting workflows and implemented **CPQ price rule logic** to automate product-specific discount conditions, eliminating manual quote configuration and introducing a governed, rules-driven pricing framework.
- Translated business processes into **scalable Sales Cloud solutions**, configuring opportunity stages and record-triggered flows to standardize the quote pipeline while designing a security model to enforce data access compliance across cross-functional teams.
- Implemented **Next Best Action (NBA)** using ML-based intelligent case classification & routing, reducing case resolution time by 20%.
- Automated deployment pipelines using Jenkins, Docker, and Kubernetes, achieving 3x reduction in deployment times.

Education

Rutgers, The State University of New Jersey

MASTER OF SCIENCE IN COMPUTER SCIENCE

New Jersey, USA

Jan 2025 - May 2026

Live Projects

AI CRM Developed an AI-assisted CRM platform that delivers actionable insights to drive sales growth and improve productivity. [here](#)

ServiceHub SaaS-based web platform that delivers location-based services and solutions in a single unified application. [here](#)

Nodebase A node-based workflow automation platform to streamline processes and connect apps through intuitive automations. [here](#)
